Please rate the overall effectiveness of the process.	4 (44%)	2 (22%)	1 (11%)	0	2 (22%)

Are there any other comments, concerns, or suggestions you would like to offer?

- Unnecessary details are requested in review of amendments that involve protocols that are already approved by the BIAUCUC.
- This suggestion does not apply to this submission but previous ones - a more detailed definition or description should be provided in regarding "minor" or "major" amendment. Our experience was most of our "minor" amendments were actually regarded as "major". Thank you!
