

School of Medicine IACUC Service Survey Summer 2017

The charts and tables below provide a snapshot of the responses to the SOM IACUC Service Survey.

During this reporting period, investigators received an invitation to complete a survey to assess their interaction and experience with the SOM IACUC. The invitation was sent to investigators who received approval from the SOM IACUC office for new protocols, amendments, and continuing reviews. The PI or contact person was asked to complete the survey one time per invitation.

Below is a summary of the results from IACUC Approvals for summer 2017.

SOM IACUC PROCESS PERFORMANCE:

Please enter any comments, concerns, or suggestions in the field below:

drug treatment or changing a variable in a project is inefficient. The waiting 2 or more weeks for review for a minor change is burdensome. I am sure having reviewers re-read the entire protocol is rough on them. The whole process is inefficient and I actually choose to not do certain experiments simply because the IACUC amendment process is so slow and a headache.

Smooth and relatively fast process.

very pleased
